

CHILD HEALTH CHALLENGE

Name _____

Date _____

Throughout today's exam, Dr. Tara will be searching for one thing: the CAUSE of your health challenge. Chiropractic wellness care seeks to find the causes of a health challenge, rather than simply trying to artificially alleviate the symptoms through chemical manipulation. The following information is vital to finding the cause of your current health condition and finding solutions to your health challenge. At Gill Family Chiropractic, we have set the bar high and expect nothing but the best results for you. In order to properly begin that process, having a detailed history is a must, so if necessary please use an additional sheet of paper.

Please check all that apply to your child's health.
